BIC code: KCM

Extent: 336 pages
Size: 229 x 152mm / 9 x 6
Illustrations: 38+ figures and tables

Rights Held: World

Description

A fresh and unprecedented collection of articles focusing on comparative analysis of development trajectories in the semi-periphery countries of South America and Central and Eastern Europe.

“Of the emerging economies, those of Latin America and Eastern Europe receive less attention than China and India. This important volume will contribute to changing this situation. From a global comparative perspective, it sheds light on economic development and on political and politico-cultural changes over the last twenty years, and offers discussion of theoretical issues.” —*Dr Uwe Becker, University of Amsterdam*

Development and Semi-periphery presents a collection of articles that focus on comparative analysis of development trajectories in the semi-peripheral countries of South America and Central Eastern Europe. As opposed to the transitology studies that were prevalent in the 1990s, and that treated the neoliberal context in these two regions separately, the articles in this book instead offer a new comparative analysis focusing on the consequences of neoliberal reforms and the new actors that deal with their results. The essays discuss the various forms of state that have unfolded in different peripheral countries, their role in the social engineering of economic models and social policies, and the impact of state capacities and ideas on institutional innovation. The volume also compares transformations in political culture, collective identities and contentious politics in both areas.

Readership: The book is aimed at students, scholars and professionals in the fields of sociology, political science, economics, law, and contemporary political economy.

Contents

Introduction – Renato Boschi and Carlos Henrique Santana; PART I DEVELOPMENT, MACROECONOMIC POLICIES AND VARIETIES OF CAPITALISM; Chapter 1. Postsocialist States in the System of Global Capitalism: A Comparative Perspective – David Lane; Chapter 2. Politics and Development: Lessons from Latin America – Renato Boschi and Flavio Gaitán; Chapter 3.
