A multidimensional look at the impact of neoliberalism within different organisational domains from both theoretical and empirical perspectives.

'This timely, stimulating and immensely informative collection of essays offers a deeply knowledgeable, theoretically sophisticated overview of neoliberalism and its pervasive effects on all spheres of government policy and social life. Its particular strength is the tracing of neoliberalism as the taken-for-granted common sense of governmental debate and organisation. A very valuable resource for all who wish to understand what has gone wrong in recent times.'—Professor Robert Reiner, London School of Economics

'This collection brings together essays demonstrating excellent research, conceptual richness and theoretical importance and contemporary relevance which are indispensable for understanding the deep and troubling consequences of neoliberalism's deep penetration of everyday life. It is clearly written, well reasoned and incisive.' —Dr Michael McKinley, Australian National University

This collection of essays incorporates the insight of an international group of experts to explore the impact of neoliberalism within different organisational domains from both theoretical and empirical perspectives. Examining neoliberalism in the context of political, social, economic and institutional domains, this volume promotes a critical and challenging approach to the social and economic attitudes characterising late-modern capitalism.

Contents

1. Introduction: A Preliminary Mapping of the Terrain – Philip Whitehead and Paul Crawshaw; 2. Neoliberalism and Crime in the United States and United Kingdom – Mark Cowling; 3.
