**A call for egalitarian distribution of wealth and power to safeguard the environment and address climate change.**

'In accessible and pithy, bite-size essays, Boyce shows how the inequality in wealth and power is both a cause and consequence of environmental degradation and social injustice. A great read for experts and a new generation alike.' —Kevin P. Gallagher, Professor of Global Development Policy, and Director, Global Development Policy Center, Frederick S. Pardee School of Global Studies, Boston University, USA

'In this elegantly written, carefully crafted, deeply personal and every bit policy-relevant volume, James Boyce adds essential new chapters on climate change, sustainable growth, universal income and, yes, the last passenger pigeon. Indispensable and delightful read for anyone interested in economics for the twenty-first century.' —Éloi Laurent, Economist, Sciences Po, France, and Stanford University, USA

'Economics for People and the Planet' challenges the myth that economic growth must come at the expense of the natural environment and advances our understanding of how a more egalitarian distribution of wealth and power can help to safeguard the environment and address climate change.

### Contents

List of Illustrations; Acknowledgements; Part I. Rethinking Economics and the Environment; Chapter 1. Limits to Growth – of What?; Chapter 2. The Twin Tragedies of Open Access; Chapter 3. Pursuing Profits – or Power?; Chapter 4. Rent in a Warming World; Chapter 5. Universal Assets for Universal Income; Chapter 6. Universal Basic Income: Six Questions; Chapter 7.
