Author website; Global Diplomacy Lab - <https://global-diplomacy-lab.org/home/>

“In reviewing this book, I found the author’s use of unconventional case studies with illustrations to convey stories quite interesting. It brings even a layman to the understanding of the importance of youth in relation to the demographic dividend and what can be done to harness it to the benefit of nations and the world at large before it is too late.” — Elizabeth Adekunle, Executive Director, African Women and Youth Organization

“This compilation is of enormous value to researchers, scholars and university libraries. The essays explore topics in an innovative and creative manner. The authors know their subjects and explore them with commitment, often producing exquisitely expressed documentation.” — Melanie Cheary, strategic communications developer for humanitarian programmes

The book is a compendium of essays from around the world on how governments and institutions can effectively manage and take advantage of the demographic dividend. It highlights the role young people can play as actors of change.
