6 x 9 inches

RIGHTS

Exclusive: WORLD

Series: Anthem Intercultural Transfer Studies

“In the midst of a pandemic, the choice of the name ‘Sputnik V’ for the Russian vaccine is not fortuitous. The same applies to the glamorous sequel to the Apollo space flights, which followed the Moon landing, or the grandiose names coined by either Chinese or European scientific authorities to promote their respective latest advancements. Boosting their prestige was among the goals intended. But so-called Science Diplomacy goes beyond those branding efforts, including the often complex relations between states, non-state actors, and scientific personnel. Dr. del Canto Viterale’s groundbreaking volume provides a comprehensive understanding of how that realm of international relations has evolved in the last decades.” — Francisco Rodriguez-Jimenez, Professor at University of Extremadura, Spain, and member of the Executive committee of the THINK TANK in Global Studies, at University of Salamanca, Spain

International Scientific Relations offers a holistic analysis of the role and impact of science, technology, and innovation in the international system of the twenty-first century.

About the Author

Francisco Del Canto Viterale is currently Assistant Professor in the Department of Space Studies in the School of Aerospace Sciences at the University of North Dakota (USA) and Director of the MA Program in Science, Technology and Global Affairs at the University of Salamanca (Spain). His core areas of knowledge are in global and international studies, with a specialization in science, technology, and innovation.
