Exclusive: WORLD

Examines the daily urban infrastructure needs of citizens, especially under rapid growth contexts, as a window into the broader concern with participation in governance, development, and visioning the future.

This book examines how four communities in the rapidly developing cities of Southeast Asia have creatively solved growing environmental problems. It's description of how community-level collaboration in Vietnam, Cambodia and Indonesia provide new ways for thinking about how marginalized people can co-create their own equitable and efficient infrastructure.

Key selling points

- A locally based study of how global urbanization is transforming communities.
- An empirically informed proposition for solving the global challenge of urban infrastructure.
- An overview of how public-private community partnerships can support equitable development.
- An illustration of how solving material problems can lead to democratic and participatory processes.

Contents

Preface; Introduction; 1. Water and Human Security; 2. Global Urbanization: The Confluence of Peri-Urbanization and Urban Transition; 3.
