Readership

Those interested in innovative approaches to the study of international relations, ethics, gender, personal data, and conflict analysis.

Key selling points

- Fills a gap in the literature pertaining to relevance of personal data in international relations;
- Identifies the nature of inclusionism in the context of international relations as a lens that questions realism at the core of the Western School;
- Introduces case studies that speak to the ethics of personal data collection in comparative perspective;
- Uses an interdisciplinary approach to link concepts in international relations and international law.
