Redresses the lack of scholarship on the issue of the pursuit of collective happiness in Soviet culture, and presents a collection of essays that discuss different manifestations of happiness in literature and visual culture.

'This volume is an invaluable collection of excellent scholarship [...] the chapters yield stunning insights into discursive claims of Soviet public and private happiness in circumstances least amenable to its flourishing: amidst poverty and homelessness, domestic shortages, postwar devastation, and routinized, mandatory celebration. The research usefully problematizes the inextricability of state celebration from private joy, labor from happiness, staged gaiety from unexpected contentment. The chapters are richly supported by thirty-six illustrations.' —*Nancy Condee, University of Pittsburgh, in 'Slavic Review'*

'...the collection is a good one, certain to interest scholars of Soviet history and culture.' —*S. M. Norris, Department of History, Miami University, in 'Slavonic and East European Review'*

Taken together, these essays redefine the preconceived notion of Soviet happiness as the product of official ideology imposed from above and expressed predominantly through collective experience, and provide evidence that the formation of the concept of individual happiness was not contained by the limitations of important state projects, controlled by state policies and aimed toward the creation of a new society.

Readership: Scholars, students and researchers in the field of Soviet culture.
